

Trane Central Monitoring:

Our Technical Specialists get to the core of the matter – faster.

So many aspects of your business depend on the consistent performance of your HVAC systems. Somebody needs to be watching for the slightest indication that something might be amiss – and that “somebody” should be Trane.

We've Got you Covered

With Trane Central monitoring watching over your building, you'll have better cost control and reduced risks. Trane Central Monitoring combines the power of our advanced remote monitoring facility with the knowledge of

Trane Technical Specialists. It's an effective and affordable way to look after your HVAC and other critical systems connected to your Building Automation System 24 hours a day, 7 days a week

#1 Name in Building Systems for 30 Years

No other company can match our network of trained and field-tested technicians. We will be happy to customize a service agreement with Trane Central Monitoring services that ideally fits your business and your operations.

Reduce the Severity and Duration of Incidents

Trane Central Monitoring puts the knowledge, training and experience of Trane Engineering Specialists at your command, 24 hours a day, 7 days a week. Whenever or on your critical building alarms is triggered, our specialist immediately initiate the appropriate response procedures.

Having Trane respond to the first call for help can significantly reduce the severity and duration of that particular incident. In many cases, we can resolve the issue from our central monitoring facility without ever having to dispatch a truck to your location. In other cases we can dispatch field resources rapidly to fix the problem on site, or we can schedule a 'business hours' service call for less critical situations. In all cases Trane's goal is to resolved your building system problems before they become your business problems.

Levels of Monitoring Services

Trane Central Monitoring is a available only with a Trane Service Agreement for customers with Trane's Tracer Summit™ Building Automation Systems. We offer varying levels of monitoring services, so you can select the option that best fits your business needs and operating budget.
